Office Action Summary

Art Unit: 1771

DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-7, drawn to polyketone solution composition.

Group II, claim(s) 8-12 , drawn to process of making polyketone fiber.

Group III, claim(s) 13-16, drawn to polyketone fiber.

2. The inventions listed as Groups I, II, III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following

Art Unit: 1771

reasons: The process of II does not necessarily require the solution of I to make the polyketone fiber. The polyketone fiber of III does not necessarily require all the steps of II since different utilities would require different modifications.

3. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Group III, claim 17 is drawn tire cord directed to polyketone fiber; claim 18 is drawn to fiber reinforced composite; claim 19 is drawn to a fiber reinforced composite which can be a tire, belt, or building material.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim

Art Unit: 1771

is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

4. The claims are deemed to correspond to the species listed above in the following manner:

Claims 13-16 are directed to the polyketone fiber.

The following claim(s) are generic: 13-16.

5. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack

Art Unit: 1771

the same or corresponding special technical features for the following reasons:

The tire cord of claim 17 which is polyketone fiber does not necessarily have to be the reinforcement fiber of the composite of claim 18 since the composite of claim 18 can have other fibers for reinforcement. The composite of 19 since it is directed to different utilities can be modified with other fibers other than the polyketone fiber.
